

Wave Angler

Fast Catamaran

Hull Form

The boat is constructed from aluminium alloy and utilizes the highly successful 'Wave Train' asymmetric catamaran hull form. It is designed primarily as an offshore utility boat and offers a large, safe and stable working deck aft. She can be fitted with either conventional propellers or waterjets and this planing catamaran offers a smooth ride even in rough waters. The robust construction allows the boat to be fitted with a wide range of equipment for angling, pot hauling or line handling.

Principal Dimensions

Length overall:	10.0m
Beam overall:	4.9m
Displacement (light):	6.0t
Draft (light):	0.5m
Speed (light):	22–28kts
Payload:	2.0t

Main Features

- Large protected working deck
- Comfortable wheelhouse with console and seating for 2–6 people
- Comprehensive navigation and communications package
